

HEALTH & SAFETY - ELECTRICAL INSTALLATIONS

Presently the Health & Safety Authority (HSA) are in the process of implementing safety requirements to the exhibition Industry. This is ongoing at the moment. This however does not mean that HAS requirements do not have to be adhered to - the opposite is the fact. To this end we as the Electrical Contractor appointed by the organiser request that all exhibitors (and their designers/contractors where appropriate) be required to adhere to all **HSA & ETCI 4** regulations presently in force for this location.

Failure to know or understand these regulations is not admissible in law as exoneration. Kindly be aware of the following:

1. The EC "provision and use of work equipment regulations 1998" places general duties on employers and lists minimum requirements for work equipment to deal with selected hazards whatever the industry.
2. If the exhibitor / employer contracts out the work on their stand making each stand (space or shell) into its own separate "workplace" and the "exhibitor" therefore "the employee" is subject to all relevant laws and regulations. Exhibitors are directly responsible for the safe use and maintenance of every element on their stand and its surrounding environs.
3. All electrical equipment must be constructed, installed, maintained, protected and used so as to prevent danger and must be compliant to latest regulations.
4. Mulvaney and Flanagan Electrical Ltd is the official Electrical Contractor appointed by the Organiser for the show. All work on stands, including any prefabbing, must be ordered through the official Electrical Contractor. It is essential that all information relating to an exhibitor's stand is given to Mulvaney and Flanagan Electrical Ltd to allow for load balance and programming of installations during and before the build up period. Appliances and prefabbed electrics supplied and used by exhibitors must be tested before being used and proof of this will be required. It is the exhibitors responsibility to provide proof of competency for this issue, particular attention must be paid to the regulations relating to extra low voltage (SELV) lighting. **All electrics to ETCI 4 regulations and CER requirements.**
5. We reserve the right to disconnect the electrical supply to any installation which in our opinion or the Organiser's opinion is dangerous or likely to cause annoyance to visitors or other exhibitors or could cause overloading.
6. Failure to advise Mulvaney and Flanagan Electrical Ltd of **all electrical requirements** for your stand is a breach of the above safety requirements and arising from this, claims or damage caused shall be the exhibitors responsibility.
7. ***Mains for stands using sockets in compliance with ETCI fourth edition regulations c/w CER regulations (711.1-711.559.14.04) must have mains supply + main fuse (no extension leads). In Option 1 the double socket will have a mains supplied but this will be fused down to 1kW loading. If requesting this option, exhibitors must sign the form on application and submitting of electrical form.**

Should you require to discuss any of the above, please call us

Please contact the official Contractor for any advice or assistance you may require with your electrical requirements at the following address
